Our 14-year-old Wonder Boy, Chan Shing Fung

Our S3 student, Chan Shing Fung, obtained A* in three International A-level subjects, namely Mathematics, Further Mathematics and Physics. With his outstanding results, Shing Fung would meet the academic entrance requirements of many top UK universities. Getting 3 A*s (the highest grade in IAL exams) at the age of 14, Shing Fung is certainly one of a kind. He has been demonstrating exceptional mathematical talent since P1 at our school. We are very happy for him and couldn't be prouder.

English Debating

Our debaters continue to make great achievements in the Hong Kong Secondary Schools Debating Competition and was crowned Champion in both the Term 1 Finals and the Grand Final. S4C Ines Bouvier was also commended as the "Best Speaker" in the Grand Final. This is the second time in a row we brought home the Champion trophy in the Grand Final of this competition.

The S4 team has expanded this year and it is exhilarating to see how well the first-timers performed in the competition against some of the strongest debate teams in Hong Kong.

Message from Ms Nancy Lee Principal

We are in the third year of the Covid-19 pandemic. The past year has not been easy for all our stakeholders. I must thank our parents, students, alumni and staff for their patience, consideration, dedication and love for our school over the past year. Everyone has helped to keep our St. Margaret's culture vibrant and our results strong despite all kinds of constraints.

I am delighted to report that our school continued to achieve astounding results in HKDSE Examination 2022. Our students took 18 subjects scoring over 100% pass rate.

Our outstanding subjects include English with 63% students scoring level 5 or above (18 with level 5*; 3 with level 5**); more than 70% with level 5 or above in Physics and Chemistry. 84.9% of our students fulfilled the requirements of admission to local universities. The announcement of main round offer results of JUPAS（大學聯合招生辦法）was released in August. 34% got admission offers from The University of Hong Kong (HKU). 18 students got admission offers from The University of Hong Kong (HKU) including 2 admission offers from the Faculty of Medicine and 1 admission offer from the Faculty of Pharmacy. About 50% got admission offers from the top 3 universities in Hong Kong in 2022, namely The University of Hong Kong (HKU), The Chinese University of Hong Kong (CUHK) and The Hong Kong University of Science and Technology (HKUST).

These results are most indicative of our standing as a Band One School. Our school is grateful to our passionate teachers and students, and to our parents for their continuous support and collaboration in this critical period.

One thing we must not forget is that all of us are faced with numerous challenges. At times we all feel bewildered. However, I would like to share an encouraging verse from the Scripture that states "I can do all things through Christ who strengthens me" (Philippians 4:13). The apostle Paul taught us that oftentimes our circumstances are beyond our control, but we should never give up, count our blessings and always strive to do our very best!

Mathematics Sharing - Tessellation of Pentagon

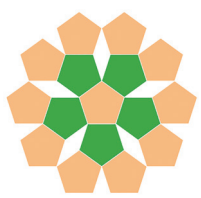

A. What is Tessellation?

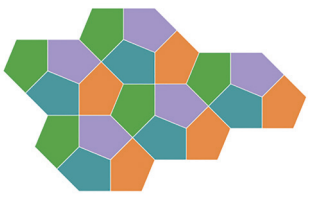

Tessellation is the tiling of a flat surface by using geometric shapes such that there are no overlaps and no gaps between the shapes. In mathematics, tessellations can be done by using regular polygons, triangles and quadrilaterals. Where the corners of the shapes meet, they always add up to 360°. Hence, we can check mathematically whether a shape can tessellate.

B. Can we tessellate a plane using regular pentagons?

The answer is No. It is because the interior angle of a regular pentagon is 108° which do not sum up to 360°. However, mathematicians have found that some pentagons can tile a plane.

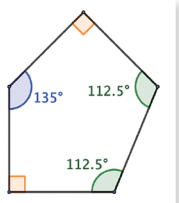

Regular Polygon

Special Polygon

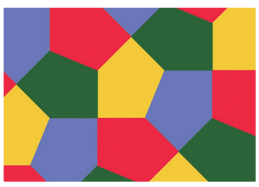

C. Cairo pentagonal tiling

This is a tessellation using this special polygon. It is commonly found in the streets of Cairo and in many Islamic decorations.

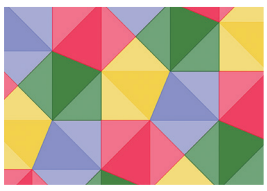

Cairo pentagonal tiling

The size of each interior angle

Let's explore the geometric properties of this special pentagon. This pentagon can be cut into two right-angled triangles and one Isosceles triangle. Therefore, there are two different ways to add up the angles to 360° (90° + 90° + 90° + 90° or 135° + 112.5° + 112.5°) when putting several pentagons together.

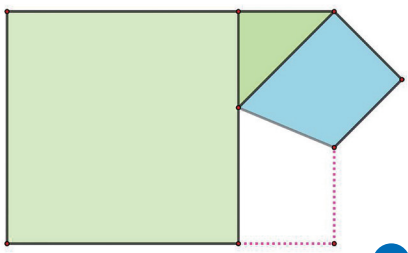

D. Paper Folding of the Special Pentagon

To make this special pentagon, we can do it by paper folding.

Procedure:

1. Take a piece of A4 paper.
2. Fold a square on the top part and then get a leftover rectangle at the bottom.
3. Fold the special pentagon as shown in the figure.

STEM+E

The STEM+E Consortium has been the organizer of the STEM+E Competition since 2018. It provides secondary school students the opportunity to learn and develop essential life skills: creative mindset, critical thinking, resilience and perseverance in this 3-month journey. Under the guidance of start-up partners and business professionals, students understand how technological solutions can solve real-world problems and learn how to apply these technological solutions to address pain-points identified in school or the community. Ultimately, students transformed their creative ideas into business plans and performed start-up pitching to compete in the championship.

STEM+E 競賽自 2018 年起由 STEM+E Consortium 舉辦。在為期3個月的旅程中，為中學生提供了學習和發展各種能力的機會，當中包括創造性思維、批判性思維、韌性和毅力。在創業夥伴和商界專業人士的指導下，學生了解技術解決方案如何解決問題，並學習如何應用這些方案來解決學校或社區發現的痛點。最終，學生們把他們的創意轉化為商業計劃，以爭奪冠軍。

Letter from Overseas – our former Prefect of Studies, Mrs Josephine Grabner

Congratulations on Building a Happy School!

Congratulations! St Margaret's is certainly a well-established school. My friends have been telling me that their children love going to school and always come home with lots of fun stories to share. They are very pleased with their kids' performance at school.

Providing children with the opportunity to learn happily in a pleasant environment is nothing less than a good deed. It would be great to see more schools doing great things as yours do. Congratulations on your school's success again.

For P5 and P6 students

Students preparing for the Christmas cards

The activity was held by the Community Service Team to show love to the people in need in Christmas time. Some P5 and P6 students participated in the activity and prepared Christmas cards and packages of masks for the elderly living alone in Sham Shui Po District.

此聖誕活動由義工組舉辦，旨在聖誕佳節向有需要的人士表達關愛。一些小五和中六學生參與其中，為深水埗區的獨居長者準備聖誕卡和口罩。

Sending Love in Christmas

Service Talk for the Community Service Team (Topic: Difficulties of INGOs under the pandemic)

We were pleased to invite Ms. Joyce Kwok from Oxfam Hong Kong to share with the members of the team her experience in poverty alleviation work and what difficulties she encountered under the pandemic in carrying her work.

本校有幸邀請香港樂施會的幹事郭小姐，向義工組成員分享她的扶貧工作經驗，以及在疫情下她在工作上所遇到的困難。

Box of Hope

Last October, we organized a community service – Box of Hope for all primary students and S3 students during Tuesday Class Teacher Period and Life Value Education lessons respectively. We collected over 100 gift boxes for the children in need in Hong Kong and our neighboring regions. We would like to share our hope and happiness with them through the activity.

去年十月，本組舉辦了一個社區服務活動——希望之盒，我們共收集了約100多盒的禮物，希望與本港及鄰近地區的小孩分享希望和喜樂！

Education Bureau Enhanced Smart Teen Project

Thirty S3 students participated in the EDB Enhanced Smart Teen Project this year. They joined the Smart Teen Camp in January and learnt about discipline, teamwork and cooperation. After the camp, they shared their valuable experiences with schoolmates in the zoom weekly assembly. Furthermore, the SDC, the Community Service Team and the school social worker co-organized an Elderly Home Visit in Fu Wing Estate on 24 June 2022.

今年共有30位中三學生參加由教育局及消防處合辦的多元智能躍進計劃，而營後活動有週會分享及探訪獨居長者等。

Our school was invited to give a sharing in an EDB's seminar in April 2022. Our teachers and student representatives shared their experiences on how the Smart Teen Programme was run in our school with over 100 teachers in the Smart Teen Briefing Session.

於今年四月，本校「多元智能躍進計劃」的統籌老師、隨營老師及學員代表，在一次教育局的分享會中，跟過百位老師分享如何籌備該計劃的心得。

Mr. Kwan Tsz Fung, Ms. Fung Hoi Ching, S3B Chan Lok Hin and S3C Yeung Hei Wun were nominated to obtain the awards given by the EDB in the Celebration of Success for the Enhanced Smart Teen Project 2021-2022 in August.
