

**Environmental Education and Community Action Project: 「體驗節能，參與減廢，愛護環境」
(Experience Energy Saving, Take Part in Waste Reduction, Care for the Environment)**

Aim: To cultivate the concepts of energy saving, recycling and sustainable development and to enhance students' environmental awareness and knowledge to alleviate environmental problems

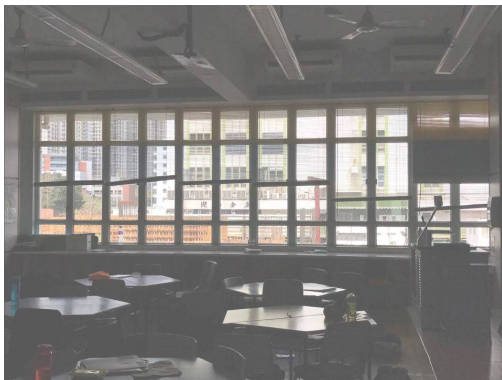

Major items installed:

Thermal Insulation Coating on the rooftop of the school library

Food Waste Decomposer

Solar Window Film in classrooms

*The project has been approved by the Environmental Campaign Committee (ECC) under the authorization of the Environment Conservation Fund Committee (ECF)

Food Waste Collection Programme:

This year, we organise the Food Waste Collection Programme in which:

Students' leftover is collected and transformed into organic fertilizers by the use of the Food Waste Decomposer.

Students are encouraged to save food and dispose leftover properly into food waste collection buckets

Secondary and Primary Environmental Ambassadors have been recruited to help with the programme:

- Collecting food waste for junior primary students
- Facilitating food waste collection for senior primary and secondary students
- Promoting the concepts of recycling and food saving through morning assembly and weekly assembly sharing, notice boards, etc.
- Recording the progress of food waste collection and fertilizers transformed

Organic fertilizers so transformed were used for growing plants in school.
